

Power Outage Protocols

Power Outage Before Shift starts

Responsibility

The Project Manager (PM) or Supervisors is responsible for notifying the Crew if a Power outage occurs before the shift starts.

Action

If Power is out, the PM/Supervisor will inform the Crew of a 2-hour delay in work, until power is restored.

Note:

PM/Supervisors must verify that the power is out in the area. If some areas are unaffected, work will continue as planned.

Power Outage during Work Hours

Responsibility

If power outage occurs during the workday, the following steps should be followed:

1. A 2-hour wait period will begin while waiting for power to be restored.
2. All Crew members are to find a stopping point in their work (finish what you are doing if able). Then exit the building to vans or shop until further notice

Action

The PM/Supervisor will verify that all areas are affected by the power outage during this waiting period.

Power Outage Occurs after the 1200 AM (midnight)

Responsibility

If the shift reaches or passes 1200 AM (midnight) and the power is still out, the shift will be considered ended.

Action

Crew members should find a stopping point in work (finish what you are doing if able). Exit the building return to their vans or shop. After verifying the situation.

Important Notes for PM/Supervisors

1. ALWAYS verify power status before making any announcements. It's possible that some areas may not be impacted by outage.
2. ENSURE the Crew is informed of any updates promptly to minimize confusions or wasted time.

BE SAFE!
